What is the difference between a UA Online degree and a University of Arizona degree?

Degrees earned through UA Online are University of Arizona degrees. These degrees have the same admissions and graduation requirements as degrees with the same title earned on the main University of Arizona campus or through one of our branch campuses, and the diplomas earned are the same. The difference is that UA Online students take all of their classes to complete their degrees online, providing a convenient option for students who prefer the flexibility to be a Wildcat from anywhere.
