The Bachelor of Science (B.S.) with a major in Public Health is designed to promote an understanding of health and disease based on public health principles. The primary goal of the program is to prepare students to work in public health to improve the quality of life of individuals and communities. The curriculum provides general knowledge regarding public health principles and practice. Field work provides students with an experience that incorporates classroom learning into public health practice and prepares them for future employment.

Admissible applicants will be admitted to Pre-Public Health. Qualified students who have completed all necessary pre-requisite courses, including lab science coursework not currently offered online by the University of Arizona, will progress into the Public Health major.
