Want to lead the technological revolution and solve the world’s greatest engineering challenges? Join the UA department that can give you the skills to advance embedded systems, cybersecurity, wireless technology, robotics and biomedical devices. Earn your Bachelor of Science in Electrical and Computer Engineering — fully online.

Faster, safer computing and communications. Better healthcare. More energy-efficient systems. These are what UA Electrical and Computer Engineering is all about.

Earning your bachelor's online means you'll learn from the same experts and receive the same student-centered curriculum as your on-campus peers, including one-on-one attention from professors and advisers. And, thanks to longstanding partnerships with companies such as Raytheon, Intel, Microsoft, NASA, Pixar and more, this degree gives you an edge in the job market as well. Most UA Electrical and Computer Engineering students receive job offers before they graduate. Others move on to become entrepreneurs or successful grad students. An online bachelor's degree in Electrical and Computer Engineering will open new doors and power up your future.
