The University of Arizona Geographic Information Systems Technology (UAGIST) master’s degree provides training for those seeking employment in the high growing geospatial industry.

Beginning Fall 2014, students will have the option of completing the Geographic Information System Technology (MS-GIST) program fully online. This comprehensive program is designed to meet the important educational needs of working professionals seeking to improve their career standing as well as recent graduates seeking employment in the high-growth geospatial industries. The program is intended for students with either extensive or limited experience in GIST. The MS-GIST program does not require a master’s thesis and can be obtained in three semesters. The program does not require a Graduate Record Exam (GRE) for admission.
